

Maximum permissible levels (MPLs) of residues of active substances of pesticides in fresh food products of plant origin fixed by Russian legislation in accordance with Hygiene Standard (GN) 1.2.1323-03 (considering addenda 1-9)

Active substance of pesticide	Name of food product in which an MPL of an active substance of a pesticide has been fixed in accordance with GN 1.2.1323-03	MPLs of active substances of pesticides in food products in accordance with GN 1.2.1323-03. mg/kg	Types of products ¹ in which MPLs of active substances of pesticides are fixed for food products included in the same group of food products in accordance with GN 1.2.1323-03, item 1.7.	MPL ² , mg/kg
	2	3	4	5
(chloride-N, N-dimethyl-N)-(2-chloroethyl) hydrazine (quartazine)	Cereal grain	NA		
	Apples	NA	Fruits - pomes, drupes and other croppers including citrus, tropical and subtropical (apples)	NA
	Potatoes	NA		
	Tomatoes	NA	Vegetables (tomatoes)	NA
[1-(4-nitrophenyl)-2-amino-1,3-propanediol] nitrate (dextramin-H)	Peaches	0.01		
	Apples	0.01	Fruits - pomes, drupes and other croppers including citrus, tropical and subtropical (apples, Peaches)	0.01

¹ Groups of food products for types of food products in which MPLs of active substances of pesticides are not fixed are given in accordance with Sanitary Regulations and Norms SanPIN 2.3.2.1078-01

² In regard of food products not included in this list it is necessary to be guided by MPLs established in Codex Alimentarius, and in the event of their absence in Codex Alimentarius MPLs of the country of origin (production) shall be applied
